Place: Room 363, Eng. Build. No. 6

Contents:

- DVD on SCG Today (company profile)
- SCG Activities toward low carbon energy society
- From Recruit to Retain; the Motivational program
- Capable Researcher; a driver of Innovation

The Siam Cement Group is one of leading Thai companies, consisting of Chemicals, Paper, Cement, Building Materials, Distribution and Investments. The Graduate School of Energy Science, Kyoto University and Siam Cement Group have signed the Memorandum of Understanding (MOU), this year for the future cooperation in the field of energy and environmental research. The important persons of SCG will visit Kyoto University to discuss about the detailed collaboration program. Taking this opportunity, a representative from SCG will present the company profile, as well as the activities relating to energy and environments. Not only PhD candidates but also master students who have interested in the international company must attend the seminar.

After the seminar, they will be consulted on the job availability. The company website is <http://www.siamcement.com/en/index.php>
