## Description

Increasingly vast energy consumption and on the other hand depletion of fossil fuel reserves lead the world into global energy crisis. In addition, global climate change and environmental pollution mainly due to gas emission from fossil fuel combustion have been a global concern. Therefore, more efficient and clean energy utilization and at the same time development of new and renewable energy sources become inevitably for providing sustainable energy and clean environment. As a part of technology development, the use of catalyst in these areas of applications shows a great importance.

To be aware of the latest development and trends of technology for sustainable energy and environment protection especially in the region of South East Asia, as well as to communicate and to discuss the cutting-edge scientific results among researchers, engineers and practitioners, *the Indonesian Catalyst Society (MKI)* and *the Sustainable Energy and Environment (SEE) Forum* in collaboration with *Department of Chemical Engineering* and *Department of Mechanical and Industrial Engineering, Gadjah Mada University, Indonesia* will host the **International Symposium on Sustainable Energy and Environment Protection (ISSEEP) 2009** which is scheduled to be held in Yogyakarta, Indonesia on November 23<sup>rd</sup> - 26<sup>th</sup>, 2009.

Topics in this symposium are categorized in the following areas:

- Clean fossil energy
- Waste treatment and environmental protection
- Rural energy
- New and renewable energy
- Energy and catalysis
- Efficient and environmental friendly energy conversion process
- Material preparation and characterization

## Paper submission

The symposium will feature oral and poster presentations. Authors are invited to submit extended abstracts via electronic-mail ([isseep@chemeng.ugm.ac.id](mailto:isseep@chemeng.ugm.ac.id)) or through [www.isseep.com](http://www.isseep.com) to ISSEEP secretariat that will be peer-reviewed. Those accepted for oral presentations are required to submit the full-paper version. The abstracts and full-papers will be included in the symposium proceeding.

The abstract, in MS word format not more than 1 page of A4 size paper, includes a maximum of 5 key-words and clearly indicates the purpose of the work, approach and results. The abstract(s) is in a single column with all margins of 2.5 cm, single space type written form and must include :

Full title of the paper (12-point font size, Times New Roman font)

Full names of the author and co-author(s) (12-point font size, Times New Roman font), and respective affiliation (10-point font size, Times New Roman font),

Telephone, fax and e-mail address of the corresponding author (10-point font size, Times New Roman font)

Main text (12-point font size, Times New Roman font)
