

The 17th IAESREC Science Café

Special Seminar

Energy

Nanotechnology

Photovoltaics

Title:

Carbon-Based Perovskite Solar Cells for Indoor Applications

Speaker:

Dr. Pipat RUANKHAM

Associate professor
Chiang Mai University

Date and time:

April 17th (Wed.) 2024

From 16:00

Venue:

Research building No.11
Room 118
Yoshida Campus
Kyoto University

Language: **English**

Contact: IAESREC members (rabemanolontsoa.harifara.5c@kyoto-u.ac.jp)

Let's
join in!

What is IAESREC Science Café?

The International Advanced Energy Science Research and Education Center (IAESREC) has been organizing Science Cafes since 2019. The IAESREC Science Café provides opportunities for students from our graduate school to engage in open discussions about science. Since its inception, we have invited speakers from various research fields to present scientific topics.

Notably, in response to the COVID-19 pandemic, we have conducted ONLINE Science Café using Zoom, allowing us to host researchers from abroad through livestreaming. Additionally, we have organized online welcome events to facilitate interactions with new international students at GSES under these unique circumstances.
